

CASE STUDY

PROJECT TYPE: ENVIRONMENTAL IMPACT ASSESSMENT
CLIENT: PALM PAPER
LOCATION: KINGS LYNN, NORFOLK

Harrison Group Environmental Limited have prepared the Environmental Impact Assessment for a proposed £340M recovered paper plant to be constructed and operated in Kings Lynn in the UK. The company was the lead consultant in all aspects of the process, from scoping the works through to preparation of the final Environmental Statement (ES). The ES was produced in a very accelerated time frame (within 6 months); and Planning Permission was granted without objection.

including the loss of reedbed habitat and potential disturbance to nesting marsh harriers

- Habitat enhancement for and translocation of grass snakes and common lizards
- Water vole surveys and mitigation plans
- Ecological Impact Assessment

Project Value: £300k

We have provided the following services to the project:-

- Comprehensive Project Scoping and Regulatory Interaction
- Consultation with statutory authorities and local conservation groups including Kings Lynn Borough Council, Natural England, the Environment Agency and Norfolk Wildlife
- Preparation of the Environmental Statement
- Strategic advice on IPPC and Abstraction Licence Applications
- Project management for water quality, water supply, and air quality
- Baseline Noise Survey
- Construction Phase Continuous Air Quality Monitoring

In addition, comprehensive Ecological Services were provided by the Harrison Group - these included:-

- Hydrologic monitoring and analysis for reed-bed design
- Habitat survey and desk study to identify potential ecological receptors
- Surveys for the following protected species groups; great crested newts, reptiles, bats, water voles and breeding birds
- Ecological supervision of site works
- Mitigation planning to address a number of issues
